

MAXFIRE JUKEBOX

Digital Music Systems

It's Nice to be FIRST

CMJS Leisure were the first company in the UK to install the New Maxfire digital Jukebox & currently supplies more Maxfire jukeboxes than any other company in the UK. - May 09

Why Maxfire?

Times have changed - E-mails have replaced letters, telephones are mobile and music nowadays is on digital jukeboxes.

We pride ourselves in being one of the most innovative companies around and Believe that if you supply the best profits will follow. The Maxfire jukebox is the most advanced jukebox available and that is why we use it.

A big display enables many things. In the case of the Maxfire the display enables this jukebox to show music videos all over the screen. If no one is using the Max Fire, the video is can be seen now on the 17" display. As a matter of course, TV's, beamer's or plasma's can be connected to the Max Fire to show your favourite music videos.

Dynamic, modern design

It is very important, to address to your audience. That's why the Max Fire has a dynamic, modern design. A clearly arranged and detailed cabinet - but with a high-tech inside:

The Future

We are working closely with TAB Austria in developing new exciting features that will be introduced to the Maxfire in the near future. The Maxfire is already the only Jukebox to be working with the official UK charts company to supply the charts from No1 to 75 every week!

TAB will soon be adding the facility to buy music directly from the Jukebox this will be available by Bluetooth or you will be able to plug your memory stick or MP3 player directly into the box and buy your favourite tune,

This is just one of the exciting features planned to be released on the Maxfire Digital Jukebox.

Coin operated gaming, amusement & vending machine suppliers
